

Spastic Colon Remedies

Spastic colon, which is another term for **irritable bowel syndrome (IBS)**, is characterized by abdominal bloating and cramping. Although there is no cure for this condition, it does not normally trigger any permanent damage to the colon. The symptoms can be quite annoying and uncomfortable, but can be easily managed through some dietary and way of life changes, with or without medications. Most of the **spastic colon** patients find enhancement in the symptoms with these simple remedial measures and healthy lifestyle changes.

Dietary Modifications

Parents can keep track of the different kinds of foods consumed by their kids, and make a note of the ones that trigger the symptoms of **IBS**. Foods which can trigger IBS may vary from kids to kids. However, the ones which have been found to be common in all include spicy foods, chocolates, dairy products, high-fat foods. So parents need to ensure that these kinds of foods must be given in limited total up to their kids when healthy, and must be completely prevented when they are suffering from IBS.
